

HISTORICAL PERFORMANCE

DESCRIPTION

The Inspire Corporate Bond Impact Equal Weight Index is comprised of 250 investment grade, intermediate term corporate bonds issued by some of the most inspiring large cap "blue chip" companies in the United States, as determined by Inspire's revolutionary Inspire Impact Score methodology which measures a company's positive impact on the world. Inspire defines "large cap" as a market capitalization of \$5B or greater and "investment grade" as BBB-/Baa3 or higher. The index is equally weighted, rebalanced quarterly and calculated on a total return basis in US Dollars.

STATISTICS

	3 Mo	6 Mo	9 Mo	1 Yr	3 Yr	5 Yr	Since 2/1/2012
Performance	3.25%	6.76%	7.73%	8.62%	10.91%	15.00%	26.26%
Performance (annualized)	13.63%	13.99%	10.44%	8.62%	3.51%	2.83%	3.19%

Past performance is no guarantee of future results. Investors cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges. This Inspire Index is not meant to represent any Inspire ETFs.

Cumulative performance is the total holding period rate of return of an investment from the start date to the current report date. **Annualized performance** is the return an investment provides over a period of time, expressed as a time-weighted annual percentage for periods shorter and longer than 1 year. **Annualized Volatility** is a statistical measure of the dispersion of returns for a given security measured by using the standard deviation between the daily returns from that same security and expressed as an annual average. Commonly, the higher the volatility, the riskier the security. **The Sharpe ratio** is the average annual return earned in excess of the risk-free rate (i.e. 1 year LIBOR) per unit of volatility as measured by the annualized standard deviation. **Maximum drawdown (MDD)** is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained.
