Past performance is no guarantee of future results. Investors cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges. This Inspire Index is not meant to represent any Inspire ETFs. All returns of one year or greater are annualized.

Annualized performance is the return an investment provides over a period of time, expressed as a time-weighted annual percentage for periods shorter and longer than 1 year. **Annualized Volatility** is a statistical measure of the dispersion of returns for a given security measured by using the standard deviation between the daily returns from that same security and expressed as an annual average. Commonly, the higher the volatility, the riskier the security. **The Sharpe ratio** is the average annual return earned in excess of the risk-free rate (i.e. 1 year LIBOR) per unit of volatility as measured by the annualized standard deviation. **Maximum drawdown (MDD)** is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained.
